Bioelectrochemistry and Bioenergetics 42 (1997) 301–305

BIOELECTROCHEMISTRY AND BIOENERGETICS

Subject Index of Volume 42

$ACTH_{1-24}$
A study of the interaction of some neuropeptides and their analogs with bilayer lipid membranes and liposomes (Hianik et al.) 123
Adsorption
Sonoelectrochemical studies of guanine and guanosine (Oliveira Brett, Matysik) 111
Amperometric titration
Glucose minisensor based on self-assembled biotinylated phospholipid membrane on a solid support and its physical properties (Šnejdárková et al.) 35
Antigen monolayer
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Artificial muscle
Bilayer dimensions and movement in artificial muscles (Otero, Sansiñena) 117
ATPase
Coupling of proton translocation through ATPase incorporated into supported lipid bilayers to an electrochemical process (Naumann et al.) 241
Avidin
Glucose minisensor based on self-assembled biotinylated phospholipid membrane on a solid support and its physical properties (Šnejdárková et al.) 35

Bilayer lipid membranes
Glucose minisensor based on self-assembled biotinylated phospholipid membrane on a solid support and its physical properties (Šnejdárková et al.) 35
Hemoglobin modified bilayer lipid membranes (BLMs) biosensor for carbon dioxide detection (Nikolelis, Siontorou) 71
Bilayers
Two mechanisms of permeation of small neutral molecules and hydrated ions across phospholipid bilayers (Volkov et al.) 153
Bioelectrochemistry
Two mechanisms of permeation of small neutral molecules and hydrated ions across phospholipid bilayers (Volkov et al.) 153
Biosensor
Hemoglobin modified bilayer lipid membranes (BLMs) biosensor for carbon dioxide detection (Nikolelis, Siontorou) 71
Impedance analysis of ion transport through gramicidin channels incorporated in solid supported lipid bilayers (Steinem et al.) 213
Biosensors
Electrochemistry of supported bilayer lipid membranes: background and techniques for biosensor development (Tien et al.) 77
Self-assembled bilayer lipid membranes: from mimicking biomembranes to practical applications (Ottova, Tien) 141
Black lipid membranes
Identification of channel membrane processes in bilayer lipid membranes by electrochemical techniques (Gassa et al.) 187
BLMs
Electrochemistry of supported bilayer lipid membranes: background and techniques for biosensor development (Tien et al.) 77
Self-assembled bilayer lipid membranes: from mimicking biomembranes to practical applications (Ottova, Tien) 141

Calcium signalling
Intracellular stores and calcium signalling in mammalian sensory neurones (Kostyuk, Shmigol) 197
Calmodulin
Calmodulin prevents the proteolysis of connexin32 by *m*-calpain (Elvira, Villalobo) 207
m–Caplain
Calmodulin prevents the proteolysis of connexin32 by *m*-calpain (Elvira, Villalobo) 207
Carbon dioxide
Hemoglobin modified bilayer lipid membranes (BLMs) biosensor for carbon dioxide detection (Nikolelis, Siontorou) 71
Catacholamine metabolism
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235
Catalytic electron transfer reaction
Tuning of lipid bilayer fluidity regulates mediated electron transfer reactions of glucose oxidase immobilized on lipid bilayer films on an electrode (Tominaga et al.) 59
Cation transport
Identification of channel membrane processes in bilayer lipid membranes by electrochemical techniques (Gassa et al.) 187
Cell manipulation
Numerical calculation of electric fields surrounding biological cells in three dimensions (Bartsch et al.) 221
Channel/membrane contributions
Identification of channel membrane processes in bilayer lipid membranes by electrochemical techniques (Gassa et al.) 187
Chronoamperometry
Photoelectrochemistry of thylakoid membranes (Agostiano, Caselli) 255
Ciliary beating
On membrane potential and ciliary stimulation (Bar-Shimon et al.) 133
Closed loop conductor
Nearly closed loops in biological systems as electromagnetic receptors (Eichler) 227
Coherence
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235
Colicin
Is it possible to induce ion channel memory control? (Cássia-Moura, Xavier, Jr.) 193

Command surface
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Conductance
A study of the interaction of some neuropeptides and their analogs with bilayer lipid membranes and liposomes (Hianik et al.) 123
Connexin32
Calmodulin prevents the proteolysis of connexin32 by *m*-calpain (Elvira, Villalobo) 207
Control
Is it possible to induce ion channel memory control? (Cássia-Moura, Xavier, Jr.) 193
Cyclic voltammetry
Electrochemistry of supported bilayer lipid membranes: background and techniques for biosensor development (Tien et al.) 77
Electrochemical reduction of metronidazole at a DNA-modified glassy carbon electrode (Oliveira Brett et al.) 175
Cytochrome *c*
Minizymes. A new strategy for the development of reagentless amperometric biosensors based on direct electron-transfer processes (Lötzbeyer et al.) 1
Characterising the formation of a bioelectrochemical interface at a self-assembled monolayer using X-ray photoelectron spectroscopy (Jiang et al.) 15
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Cytochrome c_6
Reduction of photosystem I by cytochrome c_6 and plastocyanin: molecular recognition and reaction mechanism (Hervás et al.) 249

Dielectric spectroscopy
A study of the interaction of some neuropeptides and their analogs with bilayer lipid membranes and liposomes (Hianik et al.) 123
Dielectrophoresis
Numerical calculation of electric fields surrounding biological cells in three dimensions (Bartsch et al.) 221
Differential pulse voltammetry
Electrochemical reduction of metronidazole at a DNA-modified glassy carbon electrode (Oliveira Brett et al.) 175
Dimensions
Bilayer dimensions and movement in artificial muscles (Otero, Sansiñena) 117
Dinitrophenyl antibody
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Direct electrochemistry of proteins and enzymes
Self-assembled monolayers of thiols on gold electrodes for bioelectrochemistry and biosensors (Dong, Li) 7
Direct electron transfer
Minizymes. A new strategy for the development of reagentless amperometric biosensors based on direct electron-transfer processes (Lötzbeyer et al.) 1
DNA-modified electrode
Electrochemical reduction of metronidazole at a DNA-modified glassy carbon electrode (Oliveira Brett et al.) 175
Dopac
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235
Dopamine
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235

Electric field pulses
Incorporation of macromolecules into cells and vesicles by low electric fields: induction of endocytotic-like processes (Rosemberg, Korenstein) 275
Electrochemical coupling
Coupling of proton translocation through ATPase incorporated into supported lipid bilayers to an electrochemical process (Naumann et al.) 241
Electrochemical detection (ED)
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235
Electrochemical impedance spectroscopy
Identification of channel membrane processes in bilayer lipid membranes by electrochemical techniques (Gassa et al.) 187
Electrochemistry
Characterising the formation of a bioelectrochemical interface at a self-assembled monolayer using X-ray photoelectron spectroscopy (Jiang et al.) 15
Hemoglobin modified bilayer lipid membranes (BLMs) biosensor for carbon dioxide detection (Nikolelis, Siontorou) 71
Electrochemomechanical
Bilayer dimensions and movement in artificial muscles (Otero, Sansiñena) 117
Electroincorporation
In vivo transdermal delivery of large molecules by pressure-mediated electroincorporation and electroporation: a novel method for drug and gene delivery (Zhang et al.) 283
Electromagnetic receptor
Nearly closed loops in biological systems as electromagnetic receptors (Eichler) 227
Electromechanical calculation
Numerical calculation of electric fields surrounding biological cells in three dimensions (Bartsch et al.) 221
Electron transfer
Design of novel molecular wires for realizing long-distance electron transfer (Albers et al.) 25
Electronic processes in supported bilayer lipid membranes (s-BLMs) containing a geodesic form of carbon (fullerene C_{60}) (Tien et al.) 161
Reduction of photosystem I by cytochrome c_6 and plastocyanin: molecular recognition and reaction mechanism (Hervás et al.) 249
Electroporation
Numerical calculation of electric fields surrounding biological cells in three dimensions (Bartsch et al.) 221
In vivo transdermal delivery of large molecules by pressure-mediated electroincorporation and electroporation: a novel method for drug and gene delivery (Zhang et al.) 283
Electrostriction
Glucose minisensor based on self-assembled biotinylated phospholipid membrane on a solid support and its physical properties (Šnejdárková et al.) 35
Endocytosis
Incorporation of macromolecules into cells and vesicles by low electric fields: induction of endocytotic-like processes (Rosemberg, Korenstein) 275
Enzyme activation
Frequency dependence of Na,K-ATPase function in magnetic fields (Blank, Soo) 231
Enzyme electrode
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Electrical contact of redox enzymes with electrodes: novel approaches for amperometric biosensors (Katz et al.) 95

Enzyme monolayer
Electrical contact of redox enzymes with electrodes: novel approaches for amperometric biosensors (Katz et al.) 95
ESCA
Characterising the formation of a bioelectrochemical interface at a self-assembled monolayer using X-ray photoelectron spectroscopy (Jiang et al.) 15
Extremely low electromagnetic
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235
(elf EM) fields
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235

Field trap design
Numerical calculation of electric fields surrounding biological cells in three dimensions (Bartsch et al.) 221
Finite element method
Numerical calculation of electric fields surrounding biological cells in three dimensions (Bartsch et al.) 221
Flavoenzyme
Electrical contact of redox enzymes with electrodes: novel approaches for amperometric biosensors (Katz et al.) 95
Frequency dependence
Frequency dependence of Na,K-ATPase function in magnetic fields (Blank, Soo) 231
Fullerenes
Electronic processes in supported bilayer lipid membranes (s-BLMs) containing a geodesic form of carbon (fullerene C_{60}) (Tien et al.) 161

Galparan
A study of the interaction of some neuropeptides and their analogs with bilayer lipid membranes and liposomes (Hianik et al.) 123
Glassy carbon
Electrochemical reduction of metronidazole at a DNA-modified glassy carbon electrode (Oliveira Brett et al.) 175
Glucose oxidase
Glucose minisensor based on self-assembled biotinylated phospholipid membrane on a solid support and its physical properties (Šnejdárková et al.) 35
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Characteristics of the glucose oxidase at different surfaces (Dong et al.) 63
Electrical contact of redox enzymes with electrodes: novel approaches for amperometric biosensors (Katz et al.) 95
Glucose sensor
Electrical contact of redox enzymes with electrodes: novel approaches for amperometric biosensors (Katz et al.) 95
Gramicidin D
Impedance analysis of ion transport through gramicidin channels incorporated in solid supported lipid bilayers (Steinem et al.) 213
Guanine
Sonoelectrochemical studies of guanine and guanosine (Oliveira Brett, Matysik) 111
Guanosine
Sonoelectrochemical studies of guanine and guanosine (Oliveira Brett, Matysik) 111

Hairless mice
In vivo transdermal delivery of large molecules by pressure-mediated electroincorporation and electroporation: a novel method for drug and gene delivery (Zhang et al.) 283
Hemin
Minizymes. A new strategy for the development of reagentless amperometric biosensors based on direct electron-transfer processes (Lötzbeyer et al.) 1
Hemoglobin
Hemoglobin modified bilayer lipid membranes (BLMs) biosensor for carbon dioxide detection (Nikolelis, Siontorou) 71
Heteroarene oligomers
Design of novel molecular wires for realizing long-distance electron transfer (Albers et al.) 25
High pressure liquid chromatography (HPLC)
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235
Human skin xenograft
In vivo transdermal delivery of large molecules by pressure-mediated electroincorporation and electroporation: a novel method for drug and gene delivery (Zhang et al.) 283
Hydrophobic effect
Two mechanisms of permeation of small neutral molecules and hydrated ions across phospholipid bilayers (Volkov et al.) 153

Immobilization
Characteristics of the glucose oxidase at different surfaces (Dong et al.) 63
Immoibilized glucose oxidase
Tuning of lipid bilayer fluidity regulates mediated electron transfer reactions of glucose oxidase immobilized on lipid bilayer films on an electrode (Tominaga et al.) 59
Impedance spectroscopy
Impedance analysis of ion transport through gramicidin channels incorporated in solid supported lipid bilayers (Steinem et al.) 213
In vivo
In vivo transdermal delivery of large molecules by pressure-mediated electroincorporation and electroporation: a novel method for drug and gene delivery (Zhang et al.) 283
Ion channel
Is it possible to induce ion channel memory control? (Cássia-Moura, Xavier, Jr.) 193
Ionizing radiation
Kinetics of electroinduced pores as a probe of membrane modification produced by ionizing radiation (Petcu et al.) 179
Ion pump
Frequency dependence of Na,K-ATPase function in magnetic fields (Blank, Soo) 231
Ion transport
Impedance analysis of ion transport through gramicidin channels incorporated in solid supported lipid bilayers (Steinem et al.) 213
Iron (dietary overload)
The role of desferrioxamine chelatable iron in rat liver mitochondrial dysfunction in chronic dietary iron overload (Ceccarelli et al.) 169
Iron toxicity
The role of desferrioxamine chelatable iron in rat liver mitochondrial dysfunction in chronic dietary iron overload (Ceccarelli et al.) 169

Kinetics
Is it possible to induce ion channel memory control? (Cássia-Moura, Xavier, Jr.) 193
Kinetics of electroinduced pores
Kinetics of electroinduced pores as a probe of membrane modification produced by ionizing radiation (Petcu et al.) 179

Light-induced electronic processes
Electronic processes in supported bilayer lipid membranes (s-BLMs) containing a geodesic form of carbon (fullerene C_{60}) (Tien et al.) 161

Lipid bilayer
Self-assembled monolayers of thiols on gold electrodes for bioelectrochemistry and biosensors (Dong, Li) 7
Electronic processes in supported bilayer lipid membranes (s-BLMs) containing a geodesic form of carbon (fullerene C_{60}) (Tien et al.) 161
Lipid bilayer film
Tuning of lipid bilayer fluidity regulates mediated electron transfer reactions of glucose oxidase immobilized on lipid bilayer films on an electrode (Tominaga et al.) 59
Lipid bilayers
Electrochemistry of supported bilayer lipid membranes: background and techniques for biosensor development (Tien et al.) 77
A study of the interaction of some neuropeptides and their analogs with bilayer lipid membranes and liposomes (Hianik et al.) 123
Self-assembled bilayer lipid membranes: from mimicking biomembranes to practical applications (Ottova, Tien) 141
Lipophilic anions
Binding of lipophilic anions to microbial cells (Daugelavičius et al.) 263
Liposomes
Identification of channel membrane processes in bilayer lipid membranes by electrochemical techniques (Gassa et al.) 187

Magnetic fields
Frequency dependence of Na,K-ATPase function in magnetic fields (Blank, Soo) 231
Magnetic noise (N) fields
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235
Mastoparan
A study of the interaction of some neuropeptides and their analogs with bilayer lipid membranes and liposomes (Hianik et al.) 123
Membrane binding
Binding of lipophilic anions to microbial cells (Daugelavičius et al.) 263
Membrane modification
Kinetics of electroinduced pores as a probe of membrane modification produced by ionizing radiation (Petcu et al.) 179
Membrane potential
On membrane potential and ciliary stimulation (Bar-Shimon et al.) 133
Membrane proteins
Coupling of proton translocation through ATPase incorporated into supported lipid bilayers to an electrochemical process (Naumann et al.) 241
Membranes
Electrochemistry of supported bilayer lipid membranes: background and techniques for biosensor development (Tien et al.) 77
Self-assembled bilayer lipid membranes: from mimicking biomembranes to practical applications (Ottova, Tien) 141
Membrane transport
Two mechanisms of permeation of small neutral molecules and hydrated ions across phospholipid bilayers (Volkov et al.) 153
Memory
Is it possible to induce ion channel memory control? (Cássia-Moura, Xavier, Jr.) 193
Microperoxidase
Minizymes. A new strategy for the development of reagentless amperometric biosensors based on direct electron-transfer processes (Lötzbeyer et al.) 1
Minizymes
Minizymes. A new strategy for the development of reagentless amperometric biosensors based on direct electron-transfer processes (Lötzbeyer et al.) 1
Mitochondrial function (lipid peroxidation)
The role of desferrioxamine chelatable iron in rat liver mitochondrial dysfunction in chronic dietary iron overload (Ceccarelli et al.) 169
Mitochondria (membrane potential)
The role of desferrioxamine chelatable iron in rat liver mitochondrial dysfunction in chronic dietary iron overload (Ceccarelli et al.) 169
Molecular recognition
Characterising the formation of a bioelectrochemical interface at a self-assembled monolayer using X-ray photoelectron spectroscopy (Jiang et al.) 15
Reduction of photosystem I by cytochrome c_6 and plastocyanin: molecular recognition and reaction mechanism (Hervás et al.) 249
Molecular wires
Design of novel molecular wires for realizing long-distance electron transfer (Albers et al.) 25

Na,K-ATPase
Frequency dependence of Na,K-ATPase function in magnetic fields (Blank, Soo) 231
Nitroimidazole
Electrochemical reduction of metronidazole at a DNA-modified glassy carbon electrode (Oliveira Brett et al.) 175

Optobioelectronics
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Outer membrane permeability
Binding of lipophilic anions to microbial cells (Daugelavičius et al.) 263

Partitioning
Two mechanisms of permeation of small neutral molecules and hydrated ions across phospholipid bilayers (Volkov et al.) 153
PC12 neuronal pheochromocytoma cells
Reduced dopamine levels in PC12 cells exposed to low frequency electromagnetic fields (Opler et al.) 235
Phase transitions
A study of the interaction of some neuropeptides and their analogs with bilayer lipid membranes and liposomes (Hianik et al.) 123
Phenyldicarbaundecaborane
Binding of lipophilic anions to microbial cells (Daugelavičius et al.) 263
Photoactive monolayer
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Photoelectrochemical cell
Photoelectrochemistry of thylakoid membranes (Agostiano, Caselli) 255
Photoisomerizable antigen
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Photoisomerizable electron mediator
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Photoisomerizable enzyme
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Photoisomerizable FAD cofactor
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Photoisomerizable monolayer
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43

Photoswitchable enzyme
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43
Photosystem I
Reduction of photosystem I by cytochrome c_6 and plastocyanin: molecular recognition and reaction mechanism (Hervás et al.) 249
Photosystem II
Photoelectrochemistry of thylakoid membranes (Agostiano, Caselli) 255
Planar lipid bilayer
Is it possible to induce ion channel memory control? (Cássia-Moura, Xavier, Jr.) 193
Plastocyanin
Reduction of photosystem I by cytochrome c_6 and plastocyanin: molecular recognition and reaction mechanism (Hervás et al.) 249
Polymyxin B
Binding of lipophilic anions to microbial cells (Daugelavičius et al.) 263
Polypyrrole
Bilayer dimensions and movement in artificial muscles (Otero, Sansiñena) 117
Pressure
In vivo transdermal delivery of large molecules by pressure-mediated electroincorporation and electroporation: a novel method for drug and gene delivery (Zhang et al.) 283
Probe
Kinetics of electroinduced pores as a probe of membrane modification produced by ionizing radiation (Petcu et al.) 179
Proteolysis
Calmodulin prevents the proteolysis of connexin32 by *m*-calpain (Elvira, Villalobo) 207
Pyrroloquinoline quinone
Electrical contact of redox enzymes with electrodes: novel approaches for amperometric biosensors (Katz et al.) 95

Reconstituted enzyme
Electrical contact of redox enzymes with electrodes: novel approaches for amperometric biosensors (Katz et al.) 95
Redox reactions
Electronic processes in supported bilayer lipid membranes (s-BLMs) containing a geodesic form of carbon (fullerene C_{60}) (Tien et al.) 161
Reversible immunosensor
Photoswitchable biomaterials as grounds for optobioelectronic devices (Willner, Willner) 43

Self-assembled monolayer
Minizymes. A new strategy for the development of reagentless amperometric biosensors based on direct electron-transfer processes (Lötzbeyer et al.) 1
Self-assembled monolayers
Self-assembled monolayers of thiols on gold electrodes for bioelectrochemistry and biosensors (Dong, Li) 7
Self-assembled-monolayers
Characteristics of the glucose oxidase at different surfaces (Dong et al.) 63
Self-assembled monolayer (SAM)
Characterising the formation of a bioelectrochemical interface at a self-assembled monolayer using X-ray photoelectron spectroscopy (Jiang et al.) 15
Self-synapsing neurones
Nearly closed loops in biological systems as electromagnetic receptors (Eichler) 227
Sensor
Self-assembled monolayers of thiols on gold electrodes for bioelectrochemistry and biosensors (Dong, Li) 7
Sensory neurones
Intracellular stores and calcium signalling in mammalian sensory neurones (Kostyuk, Shmigol) 197
Skin
In vivo transdermal delivery of large molecules by pressure-mediated electroincorporation and electroporation: a novel method for drug and gene delivery (Zhang et al.) 283
Solid support
Glucose minisensor based on self-assembled biotinylated phospholipid membrane on a solid support and its physical properties (Šnejdárková et al.) 35
Solid supported lipid bilayers
Impedance analysis of ion transport through gramicidin channels incorporated in solid supported lipid bilayers (Steinem et al.) 213
Solid-supported lipid layer
Coupling of proton translocation through ATPase incorporated into supported lipid bilayers to an electrochemical process (Naumann et al.) 241
Sonovoltammetry
Sonoelectrochemical studies of guanine and guanosine (Oliveira Brett, Matysik) 111
Supported BLMs
Electrochemistry of supported bilayer lipid membranes: background and techniques for biosensor development (Tien et al.) 77
Self-assembled bilayer lipid membranes: from mimicking biomembranes to practical applications (Ottova, Tien) 141
Electronic processes in supported bilayer lipid membranes (s-BLMs) containing a geodesic form of carbon (fullerene C_{60}) (Tien et al.) 161

Thienoviologens
Design of novel molecular wires for realizing long-distance electron transfer (Albers et al.) 25
Thiol
Characteristics of the glucose oxidase at different surfaces (Dong et al.) 63
Thylakoid membranes
Photoelectrochemistry of thylakoid membranes (Agostiano, Caselli) 255
Topical drug and gene delivery
In vivo transdermal delivery of large molecules by pressure-mediated electroincorporation and electroporation: a novel method for drug and gene delivery (Zhang et al.) 283
Transient aqueous pores
Two mechanisms of permeation of small neutral molecules and hydrated ions across phospholipid bilayers (Volkov et al.) 153

Ultrasonic velocimetry
A study of the interaction of some neuropeptides and their analogs with bilayer lipid membranes and liposomes (Hianik et al.) 123
Ultrasound
Sonoelectrochemical studies of guanine and guanosine (Oliveira Brett, Matysik) 111

Vesicles
Incorporation of macromolecules into cells and vesicles by low electric fields: induction of endocytotic-like processes (Rosemberg, Korenstein) 275
Voltammetry
Sonoelectrochemical studies of guanine and guanosine (Oliveira Brett, Matysik) 111
Photoelectrochemistry of thylakoid membranes (Agostiano, Caselli) 255

XPS
Characterising the formation of a bioelectrochemical interface at a self-assembled monolayer using X-ray photoelectron spectroscopy (Jiang et al.) 15
